

# EVIL GENIUSES FOR A BETTER TOMORROW

“We do it for science.”

We're the people who are ready to give the public what they have been demanding for the past several years. We are prepared to yield to the will of the people and do the following:

- Get “tough on crime” by removing such wasteful, bleeding-heart practices as the right to remain silent and the right to an appeal.
- Slash spending on benefits for veterans, so that more of that money can go where it belongs: sending people over to become veterans in the first place.
- Listen to your demands of ending the “entitlement state” by immediately terminating all government assistance to the poor and elderly. The poor shall be issued a 30-inch piece of iron pipe and told to make their own way, and your grandparents will be set adrift on ice floes.

We'll solve your problems with force, just the way you like it. We will GET THINGS DONE, unlike our competitors. We're all about giving you what you want, at prices you can just barely afford, in quantities you can't possibly need.

**EVIL GENIUSES FOR A BETTER TOMORROW:  
CHANGE WE DESERVE**
